

We're helping today's **leading health systems** transform the patient experience and improve clinical outcomes. ***Why not yours?***

Patient Xperience from ExtendedCare Solutions is an easy-to-use, *cross-generational* video-centric patient experience solution that's helping healthcare facilities transform the delivery and value of care. It links patients, care teams, and family caregivers together in a video-rich "virtual room" providing secure, shared access to personalized medical information, facility services, educational content, and entertainment. Patient Xperience empowers each patient to proactively co-own their care journey while providing care teams with automated workflows and clinical efficiencies.

Net result: *Improved patient compliance, better outcomes, and higher patient satisfaction that can positively impact your HCAHPS scores and reimbursements.*

A bedside experience unlike any other.

Patients and family caregivers can access real-time medical information empowering direct participation in the care journey, including treatment plans, discharge readiness, medications, care team profiles, and educational content. Care teams are equally empowered, benefitting from improved information-sharing, operational efficiencies, and time-saving software automation.

All stakeholders in the care journey can access Patient Xperience via iOS/Android mobile devices, in-room TVs and monitors, even hospital kiosks.

Patients and family caregivers

- Personalized patient information
- Video-based collaboration – “video visits” with family and remote clinicians
- Educational videos
- Relaxation and entertainment
- Nutrition and menu options
- Concierge services like language translation

Care teams

- Streamlined care delivery
- Nurse dashboards
- Customized patient-centric workflows
- Automated patient surveys
- Flexible reporting

Administration

- Investment leverage – integrates with and runs on existing Cisco and other infrastructure
- Rapid deployment and time-to-value
- Flexible connectivity with EMR/EHR, RTLS, and other systems

ExtendedCare Solutions is the healthcare unit of STA Group LLC, a Chicago-based provider of innovative technologies for diverse industries since 2002. More than 200 STA engineers are currently developing tomorrow’s leading-edge technology. Questions? Contact us at Sales@ExtendedCareSolutions.com.
