Extended**Care**

Virtual Care Room

We're improving **patient and provider satisfaction** with easy-to-use video visits that speed care delivery, enhance patient compliance, and lead to better clinical outcomes. *Why not you?*

Virtual Care Room from ExtendedCare Solutions is an easy-to-use video-centric telehealth solution supporting both scheduled and on-demand virtual care. We integrate state-of-the-art video into clinical workflows with virtual waiting rooms, notifications, and video visits to enhance patient and provider convenience while delivering care more cost-efficiently. Seamless interoperability with EHR/EMR systems lets you easily launch video visits within your existing healthcare workflows.

Net result: *Improved patient compliance and clinical efficiencies that can lead to lower re-admission rates, shorter lengths of stay, and other care-related benefits.*

ExtendedCareSolutions.com

The future of care delivery - available today.

Scheduling and conducting video visits is fast and easy for all participants. Virtual Care Room is accessible anytime and anywhere via web browsers, iOS/Android mobile devices, and Cisco collaboration end points.
